

DURAVISION™ GARAGE PARKING LOT MIRRORS

TRAFFIC MIRRORS
ONLINE

FEATURES

- Premium Acrylic Mirror Face
- Durable Lightweight ACM Back
- Sturdy One-Piece J-Bracket Mounting System
- Protective PVC Edge Sealant
- Smart Bottom Ventilation Hole
- Low Cost Maintenance and Cleaning
- Easy Installation and Adjustment
- 5 Year Warranty

SUITABLE USES

- Commercial Parking Buildings
- Auto Repair Shops and Service Bays
- Commercial and Industrial Warehouses
- Self Storage Facilities
- Residential Parking Garages
- Food Drive-Thru Lanes and Bank Lanes
- Forklift Loading Bays
- Vehicle Testing Stations
- Sharp Turns on Parking Ramps
- Retail Pickup Zones
- Vehicle Car Lift Assistance

WHY BUY DURAVISION?

Premium Acrylic Mirror Face

Made from 100% virgin, optical-grade Acrylite® FF, this face delivers crystal-clear reflections with zero distortion. It features a heavy-duty pure aluminum reflection that will not flake or cloud. Natively UV-stable and weather-resistant, and allows surface scratches to be easily buffed out.

Durable Lightweight Aluminum Composite Back

Aluminum Composite Material (ACM) offers exceptional durability and weather resistance, making it an ideal backing material for convex mirrors in high-demand environments like parking garages and workshops. Unlike hardboard, which absorbs moisture and warps, or plastic, which brittly cracks under impact, rigid ACM resists moisture, rust, impact, and temperature extremes, ensuring long-lasting reliability and structural stability over time.

Sturdy One-Piece J-Bracket Mounting System

This electro-galvanized zinc-plated steel bracket provides excellent rust resistance and reliable structural stability for indoor and sheltered outdoor environments. Unlike ball-and-socket mounts that can slip or loosen over time, the sturdy 8mm solid steel design holds its position securely while allowing full 360° swiveling and vertical tilt adjustments. Its compact offset easily clears wall obstacles, mounting smoothly to timber, brick, concrete, or flat surfaces, with optional U-bolts available for pole attachment..

Protective PVC Edge Sealant

Crafted from flexible, plasticized PVC, this sealant bends cleanly around curved mirror edges without cracking. It acts as a shock-absorbing cushion to protect the acrylic from chips during handling. Natively UV-resistant, it uses smart internal gripping fins to hold the face tightly without messy adhesives or rim clips that weaken and loosen over time.

Smart Bottom Ventilation Hole

This dedicated bottom hole prevents internal moisture buildup by immediately draining condensation and dew. The resulting continuous airflow stops internal fogging and protects the reflective backing from silvering damage. It also equalizes internal air pressure during sudden temperature shifts to prevent warping and internal corrosion.

EASY INSTALLATION

1. Fix the J-Bracket to a substrate with suitable screws.
2. Screw the locking bolt into the back of the mirror.
3. Slide the mirror over the J-Bracket and adjust the angle. Tighten in place. Done!
4. Use optional U-Bolts for pole mounting. (sold seperately)

INDUSTRY STANDARDS

OSHA Compliant	Yes
GSA Approved	No
TAA Compliant	Yes
BAA Compliant	No
Buy NZ Made Certified	Yes
Data Security (PCI DSS)	Yes
DuraVision Approved Distributor	Yes

OPTIONAL U-BOLTS

Purchase U-Bolts to attach the mirror to a 3 inch pole.
Sold Separately, available online.
