

DURAVISION™

HIGH VISIBILITY TRAFIC MIRRORS

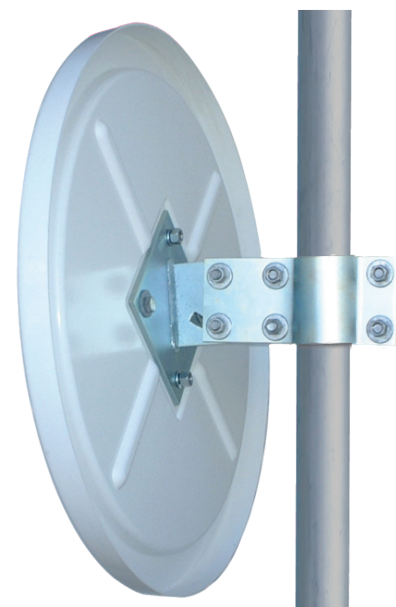

TRAFFIC MIRRORS
ONLINE

FEATURES

- Premium Acrylic Mirror Face
- Durable Outdoor ASA Molded Back
- Heavy Duty Pole Mounting System
- Hight Visibility Reflective Safety Features
- Smart Bottom Ventilation Hole
- Low Cost Maintenance and Cleaning
- Easy Installation and Adjustment
- 5 Year Warranty

SUITABLE USES

- Extreme Outdoor Weather Conditions
- Blind Intersections Requiring Extra Caution
- Highway Off-Ramps
- Pedestrian Crosswalks
- Alley Access Points
- Railway Crossings
- Cargo Handling Facilities and Ports
- Emergency Services Driveways
- Retirement Community Roads and Crosswalks
- Forklift Access Points

WHY BUY DURAVISION?

Premium Acrylic Mirror Face

Made from 100% virgin, optical-grade Acrylite® FF, this face delivers crystal-clear reflections with zero distortion. It features a heavy-duty pure aluminum reflection that will not flake or cloud. Natively UV-stable and weather-resistant, and allows surface scratches to be easily buffed out.

Durable Outdoor ASA Back With Safety Features

Designed with traffic safety in mind, the high-impact ASA backing delivers unmatched outdoor durability and a high visibility mirror frame. Unlike standard ABS, engineered ASA offers superior UV radiation and weather resistance. It prevents yellowing and brittleness under intense sunlight, ensuring the mirror remains structurally sound and highly visible in harsh roadside environments. The red reflective markings on the frame commands motorist attention, alerting drivers to hidden intersections or blind spots even in low-light, nighttime, or adverse weather conditions.

Heavy Duty Pole Mounting System

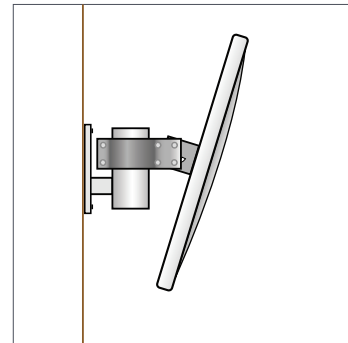

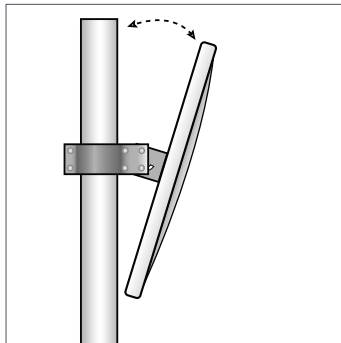

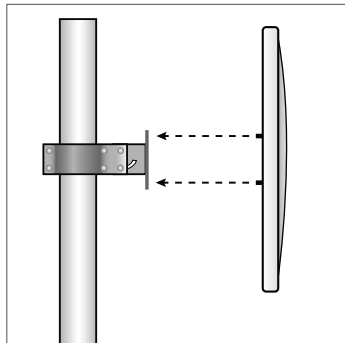

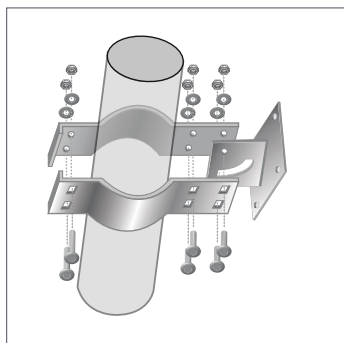

This galvanized steel clamp bracket is engineered for high strength and durability in demanding outdoor environments. Heavy-duty construction provides maximum stability and secure mounting for 3 inch diameter poles, while the hot-dipped galvanized finish delivers superior corrosion resistance against extreme weather conditions, ensuring long-lasting performance and reliable support year-round, unlike ball and socket systems, which can loosen over time. Optional Wall Mounting Adaptor is available for flat surfaces.

Smart Bottom Ventilation Hole

This dedicated bottom hole prevents internal moisture buildup by immediately draining condensation and dew. The resulting continuous airflow stops internal fogging and protects the reflective backing from silvering damage. It also equalizes internal air pressure during sudden temperature shifts to prevent warping and internal corrosion.

EASY INSTALLATION

1. Fix the clamp assembly to a 3" pole, making sure the slot adjuster is at the bottom.
2. Fix the mirror to the mirror mounting plate.
3. Tilt the mirror using the slot adjuster to find the right angle. Tighten in place. Done!
4. Use optional Wall Adaptor for wall mounting. (sold separately)

INDUSTRY STANDARDS

OSHA Compliant	Yes
GSA Approved	No
TAA Compliant	Yes
BAA Compliant	No
Buy NZ Made Certified	Yes
Data Security (PCI DSS)	Yes
DuraVision Approved Distributor	Yes

OPTIONAL WALL ADAPTOR

Purchase a Wall Adaptor to attach the mirror to a flat surface.
Sold Separately, available online.
