

DURAVISION™ STAINLESS STEEL HIGHWAY MIRRORS

TRAFFIC MIRRORS
ONLINE

FEATURES

- 304 Optical Stainless Steel Mirror Face
- Heavy Duty Vinyl Celuka Back
- Heavy Duty Pole Clamp Mounting System
- Protective PVC Edge Sealant
- Non Rust, Scratch Resistant, Easy to Clean
- Easy Pole Installation and Adjustment
- 5 Year Warranty

SUITABLE USES

- Highway Traffic in Exposed Areas
- Exposed Gravel or Vandal Prone Environments
- Extreme Outdoor Weather Conditions
- Driveways and Intersections Exposed to Wind
- Quarries, Rock Crushing and Mining Areas
- Areas Subjected to Heavy Dust and Grit
- Extreme Coastal Environments
- Cargo Handling Facilities and Sea Ports
- Heavy Machinery Loading Bays
- Chemical Processing Facilities
- Blind Corners on Exposed Dirt Roads

Part No. (mpn)	Size	View Distance	Clamp Dia.	Bracket Length	Mirror Mount
66066C	24 inch	Up to 140 feet	3 inches	9 3/4 inches	2 Fastening Bolts
66087C	32 inch	Up to 200 feet	3 inches	9 3/4 inches	2 Fastening Bolts
66445C	40 inch	Up to 250 feet	3 inches	9 3/4 inches	4 Fastening Bolts

WHY BUY DURAVISION?

Optical Quality Stainless Steel Mirror Face

DuraVision 304-grade stainless steel convex mirror faces deliver premier durability and impact resistance for demanding US industrial and commercial driveways. Engineered to eliminate blind spots, these virtually unbreakable, precision-curved surfaces provide exceptional, distortion-free reflectivity. Their superior weatherproofing ensures long-term outdoor reliability, low maintenance, and maximum safety at critical property exit points.

Heavy Duty Vinyl Celuka Back

Outlasting standard ABS plastic, the vinyl Celuka backing features built-in UV stabilizers to prevent cracking. Its insulating micro-cellular foamed core reduces temperature transfer to minimize internal fogging. Completely immune to rust, rot, and salt spray, while effectively dampening physical shocks and vibrations across extreme temperature shifts without warping.

Heavy Duty Pole Mounting System

This galvanized steel clamp bracket is engineered for high strength and durability in demanding outdoor environments. Heavy-duty construction provides maximum stability and secure mounting for 3 inch diameter poles, while the hot-dipped galvanized finish delivers superior corrosion resistance against extreme weather conditions, ensuring long-lasting performance and reliable support year-round, unlike ball and socket systems, which can loosen over time. Optional Wall Mounting Adaptor is available for flat surfaces.

Protective PVC Edge Sealant

Crafted from flexible, plasticized PVC, this sealant bends cleanly around curved mirror edges without cracking. It acts as a shock-absorbing cushion to protect the acrylic from chips during handling. Natively UV-resistant, it uses smart internal gripping fins to hold the face tightly without messy adhesives or rim clips that weaken and loosen over time.

Easy Maintenance

Stainless Steel requires minimal maintenance, significantly reducing long-term upkeep costs. The non-porous, non-rust, ultra-smooth surface resists scratching, dirt buildup, oil, and environmental grime. Cleaning requires only a simple wipe down with water and mild soap to restore original, distortion-free clarity.

EASY INSTALLATION

1. Fix the clamp assembly to a 3" pole, making sure the slot adjuster is at the bottom.
2. Fix the mirror to the mirror mounting plate.
3. Tilt the mirror using the slot adjuster to find the right angle. Tighten in place. Done!
4. Use optional Wall Adaptor for wall mounting. (sold separately)

INDUSTRY STANDARDS

OSHA Compliant	Yes
GSA Approved	No
TAA Compliant	Yes
BAA Compliant	No
Buy NZ Made Certified	Yes
Data Security (PCI DSS)	Yes
DuraVision Approved Distributor	Yes

OPTIONAL WALL ADAPTOR

Purchase a Wall Adaptor to attach the mirror to a flat surface.
Sold Separately, available online.
